## DIRECTIONS FOR USE

DO NOT spray in the heat of the day or when the plant is under moisture stress. DO NOT spray to the point of runoff. Use as fine of a spray mist as possible. Allow 3-4 hours after application before sprinkler irrigating to avoid washing the product off.

Recommended mixing sequence: water, adjuvants, pesticides, FBSciences nutrient products, other fertilizers, balance of water while agitating. When mixing with high phosphate fertilizers, add a citric acid buffer until the pH is 4.5 to 5.0 to improve compatibility and uptake. Ensure agitation is available when mixing with sulfate fertilizers. A standard jar test is recommended before tank mixing.

## RATES & TIMING FOR ALL CROPS

Apply **1-4 quarts/acre** anytime during the growing season; use the higher rate with spray volume greater than 50 gallons per acre; repeat as needed.

## INSTRUCCIONES DE USO

NO rociar en el calor del día o cuando la planta esté bajo estrés hídrico. NO rociar hasta el punto de escurrimiento. Usar una neblina de rociado tan fina como sea posible. Deje pasar de 3-4 horas después de la aplicación antes de regar con aspersión para evitar lavar el producto.

Secuencia de mezcla recomendada: agua, adyuvantes, pesticidas, productos nutritivos de FBSciences, otros fertilizantes, balance de agua mientras se agita. Al mezclar con fertilizantes altos en fosfato, agregar un buffer de ácido cítrico hasta que el pH esté de 4.5 a 5.0 para mejorar la compatibilidad y la absorción. Asegurarse de que la agitación esté disponible cuando se mezcla con fertilizantes de sulfato. Se recomienda realizar una prueba de jarra estándar antes de mezclar en el tanque.

## TASAS Y MOMENTO PARA TODOS LOS CULTIVOS

Aplicar de **1 a 4 cuartos de galón/acre** en cualquier momento durante la temporada de crecimiento; usar la dosis más alta con un volumen de rociado superior a 50 galones por acre; repetir según sea necesario.

**WARNING:** This product contains boron. Over application or excessive use of boron, or use on crops other than those listed, can result in boron toxicity, causing foliar damage or serious plant injury.

**WARNING:** The application of fertilizer material containing molybdenum (Mo) may result in forage crops containing levels of molybdenum (Mo) which are toxic to ruminant animals.
