

Soybean Cyst Nematode Protection You Can Depend On

Aveo® EZ Nematicide is a seed treatment solution to help growers protect their soybean fields from soybean cyst nematode (SCN). With its highly concentrated formulation, Aveo EZ offers dependable protection to help enhance the plant’s genetic resistance. The low use rate and flexibility to use as a stand-alone product allow retailers an easy-to-use option that provides growers complete protection.

- ▶ Highly concentrated formulation contains more colony forming units (CFU) per ml than the competition for consistent performance
- ▶ Flexibility to optimize the ratio of nematicide to fungicide and insecticide protection in soybeans from a stand-alone product
- ▶ Low use rate that requires minimal adjustment to treater settings

Aveo EZ—Consistent Performance

Concentration Advantage	Labeled Use Rate
Poncho®/VOTiVO® 2 x 10 ⁹ cfu/ml	0.13 mg AI/seed (1 fl oz/140,000 seeds)
Aveo EZ 6.1 x 10 ¹⁰ cfu/ml	0.1 fl oz/140,000 seeds
Clariva® 1.0 x 10 ¹⁰ spores/ml	1–3 fl oz/100 lbs seeds (0.5–1.5 fl oz/140,000 seeds)

Highly concentrated formulation containing more colony forming units (cfu) per ml than the competition.

In known SCN environments, Aveo EZ provided a 1.8-bushel yield increase. Trials in the following states: AL (3), IA (2), IL (2), MI (2), MN, MS, NE (4), OH (2).

How To Use

Rate	0.1 fl oz/140,000 seeds
SKU Size	4 x 1 gallon case
Product Designations + Regulations	Treated seed must be labeled with a seed bag tag
