

Proliant™ Plus

PLANT GROWTH REGULATOR

INNOVATIVE FORMULATION OPTIMIZES PLANT GROWTH AND MAXIMIZES YIELDS

Proliant™ Plus is a state-of-the-art biorational product for rice with a unique mode of action. It combines two naturally occurring plant hormones responsible for yield enhancement and helps plants overcome early season stress by optimizing plant growth, tillering, and root establishment. This maximizes rice yield and improves water management without negatively impacting grain quality.

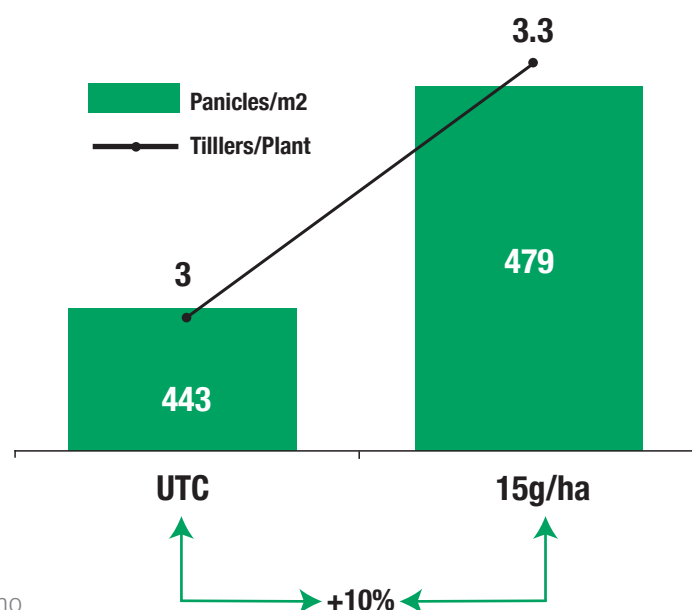

BENEFITS OF PROLIANT PLUS

- Increases yield by up to 10%
- Promotes quicker plant growth, supporting weed control measures
- Improves fertilizer utilization
- Compatible with herbicide and insecticide applications

Increases Number of Tillers and Panicles

Applying 15g/ha of Proliant Plus at the beginning of tillering increased the number of tillers and panicles by an average of 10%.

Years Tested: 2015-2018

Number of Studies: 10

Regions Tested: Tretinta y tres, La Chiva, Vergara, Lascano

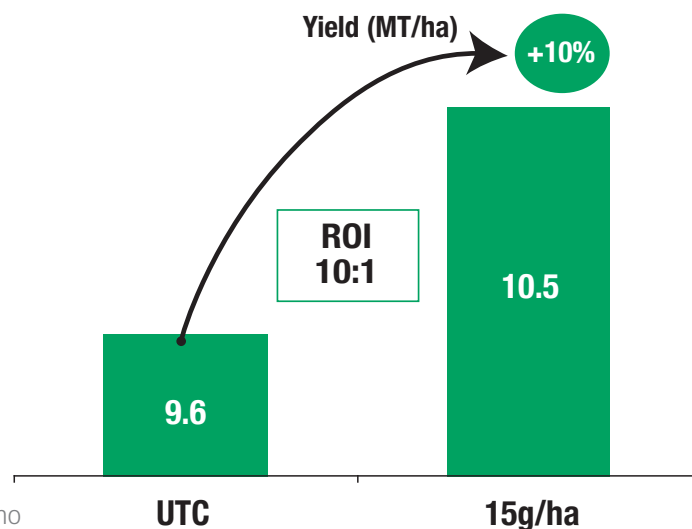

Strong Return on Investment - 10:1

Applying 15g/ha of Proliant Plus at the beginning of tillering increased grain yield by an average of 10%.

Years Tested: 2015-2018

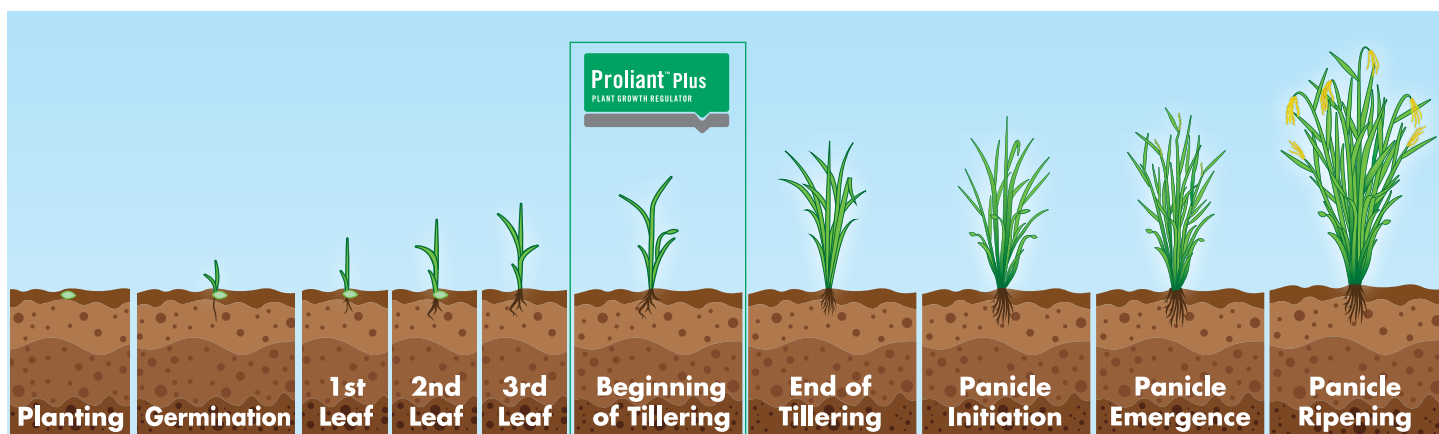

Number of Studies: 10

Regions Tested: Tretinta y tres, La Chiva, Vergara, Lascano

When to Apply Proliant Plus

Proliant Plus should be applied at the time of tiller initiation, as indicated in the boxed image below.

Always read and follow label instructions.
